

Health Update

Thank you to all of those who participated in the recent AHT/Kennel Club Health Survey. We hope to have an analysis of the results of the survey in the near future, as publication of the results has been slightly delayed due to the good response. As soon as this is available we will inform our members and the breed as a whole.

At our championship show on October 2nd we are planning to set aside a small dark room with an obstacle course to enable exhibitors to test their dogs' eyesight in the dark. You will be free to use this either unsupervised or with the help of a Committee member if you wish. It requires 2 people - one to hold the dog at the start and the other to call the dog at the end of the obstacle course.

If you have any cause for concern about your dog's eyesight following the test, we hope you will talk to a member of our Committee or to the eye panel vet at the show. There is no need to book but please come to the Secretary's table before trying out the course. We hope you and your dogs will enjoy the experience.
